• Projects

Learning & Development Training Module

- Tech Stack: React JS, Hooks, API Integration, SQL, State Management, Components, HTML, CSS.
- Built a digital Learning & Development module to automate training requests, approvals, scheduling, and feedback workflows.
- Developed dynamic, component-based forms with validation, conditional rendering, and API-driven data flows.
- Implemented role-based access control (RBAC) for HR, managers, trainers, and employees.
- Created dashboards for 30/60/90-day training effectiveness, centralized reporting, and audit analytics.
- Improved user experience with optimized state management using Hooks and reusable UI components.

Auto Emails for Mandatory Refresher Courses

- Tech Stack: HTML, CSS, JavaScript, jQuery, SQL, Apache Freemarker
- Automated reminder emails every 15 days based on course completion using scheduled triggers.
- Built dynamic email templates and integrated escalation logic for overdue users.
- Ensured accuracy through database checks and configurable workflows for HR compliance.

Trainee Confirmation Module

- Tech Stack: React.js, JavaScript (ES6), API Integration, SQL, Freemarker, HTML, CSS
- Developed an end-to-end trainee confirmation workflow covering confirmation, extension, and non-confirmation processes.
- Built assessment forms, role-based approval screens, and automated email reminders using React.
- Integrated data with Adrenalin HRMS to sync trainee status and actions.
- Created dashboards for tracking pending approvals, escalations, and trainee lifecycle status.
- Reduced HR manual follow-ups and processing time by 60% through automation and real-time UI updates.

• Other Experience:
